# RESULTS

# Army OIF Medical Evacuations by Diagnosis Group, 2003 - June 2006<sup>1-4</sup>

<sup>1</sup> Total evacuations: n= 25,331

<sup>2</sup> ICD-9 codes obtained from TRAC<sup>2</sup>ES

<sup>3</sup> Percents represent the percent of all evacuations in each diagnosis group

# Summary

---

- Non-battle injuries (NBI) are the leading cause of medical air evacuations from OIF
- 17 Soldiers per 1000 Soldiers assigned to OIF have been medically air evacuated for NBI
- Falls/jumps, sports, and motor vehicle - related accidents are the 3 leading NBI causes resulting in air evacuation
- These data provide a 1<sup>st</sup> look at causes of non-battle injuries among deployed Soldiers. Many of these injury causes are preventable and should be further evaluated to develop prevention strategies and policies.
